

CURRICULUM VITAE

Tushar Madhavrao Chavhan

Contact:

Address:

A-307, Kohinoor Viva City, D.N.
Parande Park Marg, Dhanori, Pune
411015

Phone:

+91 9765886514

Email:

Tmchavhan1990@gmail.com

Personal Details:

Date of Birth:

01st January 1990

Marital Status:

Married

Languages Known:

English, Hindi, Marathi.

Technical Skills /Software Handled:

- Wireshark
- WinScp
- Xlite
- Eyebeam
- PRI Tester, BRI Tester.
- MobaXterm/Putty
- MS Office.

Career Highlights

- 10+ years of hands on experience in configuration and maintenance of telecom network in various domains.
- Hands on Experience in configuration & troubleshooting, testing of Private 5G Core Network elements like AMF, SMF, UPF, UDM, AUSF of the OEM Druid, Athonet, Ataya etc.
- Hands on experience in configuration of LTE Nokia CMG, CMM, ZTE Netnumen's 3G & LTE elements like SGSN, GGSN, MME, S-GW, P-GW etc. & Inflobox DNS.
- Hands on Experience in configuration, Testing, troubleshooting of the private 4G nodes of the private networks of the OEM Nokia, Athonet, Telrad (Breeze COMPACT 1000e, Breezeway 2020)
- PACO related KPIs trend monitoring, analysis and improvement plan.
- Understanding of various interfaces and Protocols like GTP, DIAMETER, HTTP2, S1AP, NGAP, PFCP etc.
- Hands on experience in configuration, Testing, troubleshooting of 5G CPE devices like, Robustel, Proscend, RUTX11, RUTX50, Telrad CPE 12000 U and Sparsh 5G camera etc.
- Experience of NOC in configuration, Testing and Troubleshooting of 4G, 5G Core networks nodes and Tx nodes.
- Conceptual understanding of Kubernetes deployments.
- Possessing extensive knowledge of provisioning, troubleshooting, Fault management, Acceptance test of transmission nodes, such as Ceragon, Huawei U2000, ZTE, NEC, FPMR, BG, and μSDM.
- Rich Field Experience in operation & maintenance of transmission network devices.
- knowledge of various modems used for commissioning of DLC (Digital Loop Carrier) such as LOOP, RAD, ACTELIS, ALBIS, RADWIN.
- provisioning, troubleshooting, Fault management, Acceptance test of various MW links and nodes.

Experience

❖ **Manager (Vodafone-UK) (Apr.2025 to till date) Tata communications and Transformation Services ltd (TCTSL), Pune.**

- Engaged in due diligence (Discovery) Project to document current (“As-Is”) processes across MOVE and Mobility teams, identifying gaps, redundancies, and ownership responsibilities.
- Actively contributed to RFP responses for 4G EPC and 5G Core projects, covering architecture design, capacity planning, and solution compliance as per 3GPP standards.
- Conducted dimensioning and capacity estimation based on subscriber growth, throughput projections, and signalling load for EPC and 5GC deployments.
- Collaborated with cross-functional teams (RAN, Transport, IMS, Security, Cloud/Virtualization) to ensure end-to-end solution alignment and SLA compliance.
- Supported commercial teams with BOM preparation, technical clarifications, compliance matrix evaluation, and customer technical workshops during pre-sales discussions.

❖ **Assistant Manager (5G & IOT NOC) (Oct. 2022 to Apr.2025). Tata communications and Transformation Services ltd (TCTSL), Pune**

Roles and Responsibilities:

- Operations and Maintenance of Private 5G Network Nodes such as Athonet & Druid (AMF,SMF,UPF,UDM), and private 4G nodes of Nokia, Athonet, Telrad OEMs.
- Responsible for configuration of the 5G core network elements alongwith engineering team to ensure accurate configuration and integration within the system.
- Responsible for Testing, troubleshooting of 5G Network elements & Process Optimization.
- Airspan radio software upgrade, Athonet core 5G elements license upgrade.
- KPI monitoring, trend analysis and improvement plan for 5G nodes.
- Work closely with Product, OEM and vendor team of Private 5G & IOT Network.
- Testing the various industrial Use cases over 5G network, like environmental sensors, Geo- fencing, Quality inspection, Inventory management, AGV (Automatic Guided Vehicle) etc. using camera over 5G network.
- Responsible for end to end sanity testing of the newly configured 5G Kit for the different clients Proof-of-Concepts (PoC).
- Managed multiple Proof-of-Concepts (PoC) evaluations for vendor/OEM selection.
- Responsible for the 5G CPE devices testing and troubleshooting.
- Reports Building, KPIs Analysis, Fault restoration, and Customer Relationship Management.
- Configuration Management for IOT devices on application platform.
- Working together with OEMs and vendors for the fault resolution which needs vendor/OEM support.
- In different client Proof-of-Concepts (PoC) to test, configure, and troubleshoot the problems over the 5G network as per the client requirements.
- To Ensure the closure of the tickets by resolving the issue within TAT.

❖ **Associate. (SNOC Packet Core) (Apr. 2021 to Oct.2022). Vodafone idea ltd on payroll Quess Corp.ltd, Pune**

Roles and Responsibilities:

- SNOC (Change management) Operations of Packet Core Nodes Like SGSN, MME, S-GW, P-GW, GGSN, Infoblox DNS and ISP network.
- Responsible for configuration over the Nokia LTE elements CMG, CMM (SGW/PGW /MME) & ZTE Netnumen (SGSN, GGSN, SGW, PGW) & and various link between elements.
- PACO related KPIs, trend analysis and improvement plan.
- Support for new Network node integrations and acceptance like MME, S/P G-W etc.
- Support to vendor team and cross functional team for traffic block/unblock in case of IMS node upgradation from the 4G core.
- Data roaming concerns and testing scenarios for in & out roamers as per IR21.
- Coordination with Vendors for resolution of the Faults / Problems needing vendor support.

❖ **Associate.** (SNOC Transmission) (May. 2019 to Apr. 2021). **Vodafone idea Ltd** on payroll of **Temlese services Ltd**, Pune

Roles and Responsibilities:

- Operation & Maintenance of ECI, HUAWEI, NEC, FPMR, Ceragon & ZTE Transmission networks.
- Capacity upgradation, Equipment Swapping & migration of transmission nodes.
- Provisioning of 2G, 3G, 4G, DCN services.
- Responsible for HUAWEI, NEC & ZTE transmission node software upgradation, patch upgradation.
- Trails, services Creating & Deleting, modification in NMS.
- offers technical support from a NOC standpoint to help field engineers complete their work on major activities and network failures.
- Trails, Services rerouting at the time of Fiber cut to offer seamless service to end customer.
- DCC Creation, Node IP & Gateway IP Migration.
- Planned event Management of Major Traffic rerouting/Shifting.
- Identify Priority basis Faults/Alarms and recommend appropriate resolution action.
- Performs Acceptance tests on new Fiber/microwave link.

❖ **Assistant Manager** - (Fttx Jio fiber) (Nov. 2018 to May 2019) **Reliance Jio Ltd**, Mumbai

Roles and Responsibilities:

- Acquire and connect home and micro enterprise customers as per target. Release building permission to RFS buildings. Release of building land base for network deployment. customer acquisition.
- Manpower & material Management : ensuring engineers team availability, material availability. Material reconciliation every week.
- Ownership of SLA delivery and customer Satisfaction: Dashboard base SLA Management. Escalation management. Quality and audit.

❖ **Field Operation Engineer** (Jun. 2016 to Nov. 2018) **TATA Teleservices Maharashtra Ltd (TTML)** on pay roll of "**Clear secure Services Ltd**", Mumbai

Roles and Responsibilities:

- Delivery of New PRI and SIP Trunks Operation ,Maintenance of existing links & and performing UAT.
- Testing Customer PRI and SIP on Xlite eyeBeam soft tools.

- Delivery of New ILL,DLC,MPLS links to the corporate customers & Operation ,Maintainance of existing links.
- To put cross patching on patch panel of Lucent Equipments.
- Responsible for carrying out BER Test for all new circuit in co-ordination with NOC, SOC, SWITCH team.
- Responsible for Co-ordination with other Telecom operator Like Bharti, VSNL, GLOBAL RELIANCE, VODAPHONE enterprises & more for maintenance.
- Responsible for maintenance of Corporate Customer with National account.
- Responsible for Installation of Corporate customer links over a MUX and various RF and copper media.

❖ **Desktop support Engineer** - (Sep. 2014 to May 2016) Next Zone Technologies Pvt. Ltd, Nasik

❖ **Diploma Professor** - (Jun 2013 to Sep. 2014) ASSP Polytechnic college, Chinchpura, Jalgaon

Continuous Learning & Upskilling

- 4G Network Fundamentals – Coursera
- 5G Network Fundamentals – Coursera
- 5G for Everyone – Coursera
- 5G Network Architecture and protocols – Coursera
- 5G Network Slicing – Linkedin Learning
- Principle and Technologies of 5G Mobile Network – Coursera
- Oracle Cloud Infrastructure 2025 Multicloud Architect Professional – Oracle University
- Oracle Database@AWS Certified Architect Professional – Oracle University
- Oracle cloud foundation Associate – Oracle University
- Building AI Literacy – LinkedIn Learning
- AI for Everyone – Coursera
- Project management foundation – Linkedin Learning
- Kubernetes for absolute beginners – Udemey
- Cisco Certified Network Associate (CCNA) v1.1 (200-301) – Linkedin Learning

Education

- **Bachelor of Engineering:** Electronics and Telecommunication – 2013
North Maharashtra University, Jalgaon
- **H.S.C. -2008**
Divisional Board, Nasik.
- **S.S.C. - 2006**
Divisional Board, Nasik.

Declaration

I hereby declare that the above-mentioned information is true to the best of my knowledge and belief.
